

Local Council Risk System (LCRS) Software

DMH has developed Local Council Risk System (LCRS) to allow Town or Parish Clerks to quickly identify and score their local risks. The system has been designed by internal auditors with the aid of several Town and Parish Clerks.

Designed by practising professionals specifically to meet the needs of Local Councils and assist in the general administrative process, the system combines ease of use with effective solution. More than 390 general risks and 1,100 controls, identified in service areas, that can readily be amended or supplemented to account for unique local risks, are built into the programme. A straightforward scoring and reporting system leads to an action plan that pinpoints both timescale and responsibility.

The continuing development of a unique risk database means that updates combining the latest risks and background issues will be available annually.

LCRS Screen shot

Some examples of the areas covered:

- Allotments
- Bus Services
- Bus Shelters
- Bye Laws
- Car Parks
- CCTV
- Clocks
- Community centres
- Computer Equipment

*See our online video at
www.dmhsolutions.com/lcrs*

The system takes you through a simple 5 step scoring process.

LCRS Process:

- Step 1 - Enter your town or parish council details.
- Step 2 - Select the relevant areas that relate to your council.
- Step 3 - Score your risk, add any additional local risks.
- Step 4 - Record your action plan of your risk areas.
- Step 5 - Run your risk reports.

The scoring system is a five step process starting with entering your council details followed by selecting and scoring your risks. LCRS allows you to add new risks and amend current risks to your local situation. Action plans can also be added and printed out.

The reports show that the risk assessment has been completed and any poorly controlled risks have been highlighted for action and can be allocated to individuals. Reports are automatically produced for auditors and councillors. We provide telephone support and are continually updating our risks database which currently stands at over 400.

Benefits:

- Simple five step process.
- Most risks already listed.
- Your legal requirements listed.
- Add your own local council specific risks
- Customised reports automatically produced.
- Action plan automatically created.
- Insurance and Health and Safety check list reports included.

Satisfied users include:

- ♦ Driffield Town Council
- ♦ Holyhead Town Council
- ♦ Snaithe & Cowick Town Council
and over 400 other Councils.
- ♦ Goole Town Council
- ♦ Hornsea Town Council

Cost:

The cost is £75.00 + £3.19 postage and package + VAT = £91.87. A yearly update will be available costing £20.00 which will include the latest list of risks and background information.

Requirements:

A PC with Windows XP or Vista with hard disk space of 20Mb.

Ordering:

Order on-line, or via email to lcrs@dmhsolutions.com or complete the following and send or fax to:

DMH Solutions Ltd, 1 Ardgowan Crecent, Croy, Inverness, IV2 5PA.
